

ANANT V. MATH

+91 9561500222 | anant.math@tatamotors.com | Ahmedabad, Gujarat

EXECUTIVE SUMMARY

Senior Manufacturing Operations Leader with **30+ years** of progressive experience across Tata Motors, Mahindra, and General Motors environments. Established track record of owning plant-level manufacturing operations, leading cross-functional programs, and driving new model launch readiness in complex, high-volume automotive settings. Currently responsible for Paint Shop Maintenance CAPEX budgets of approximately **₹4 Crore** and leading teams of **50 members**, with prior leadership of **150+ members**. Recognised for strong stakeholder management, disciplined risk governance, and delivering **zero-defect, zero-field-issue** manufacturing outcomes. Thorough knowledge of TML product range and CV manufacturing systems. Recipient of the TBEM Gold Standard; ranked **#1** on the Tata Group e-learning platform among 16,000+ employees.

CORE COMPETENCIES

- Launch Management & New Model Introduction
- Production Scheduling & Manufacturing Readiness
- Stakeholder & Supplier Management
- Project Monitoring & Timeline Adherence
- Manufacturing Operations Ownership
- Operational Excellence & Cost Optimisation
- Cross-Functional Program Leadership
- Risk Assessment, Governance & Mitigation
- LQOS Process Management & Deliverables Closure
- Quality Strategy & Zero-Defect Environment
- Team Leadership & Organisational Development
- Manufacturing Strategy & Governance

PROFESSIONAL EXPERIENCE

Tata Motors Ltd – Passenger Vehicles, Sanand | Ahmedabad, Gujarat

Oct 2017 – Present

Deputy General Manager – Paint Shop Operations & Project Support

- Owned end-to-end Paint Shop operational leadership for **five simultaneous new model programs** — Punch, Nexon EV, Altroz, Tiago, and Tigor — governing launch readiness, production plan adherence, and cross-functional milestone delivery from program entry through production ramp-up.
- Led a multidisciplinary team of approximately **50 engineers, supervisors, and technicians** while driving manufacturing readiness, equipment reliability, quality compliance, and operational performance.
- Owned risk assessment and mitigation governance for launch phases — proactively identifying and closing risks related to equipment readiness, process compliance, and supplier performance to protect program timelines and product quality.
- Drove LQOS deliverables tracking and closure discipline, maintaining zero-field-issue standards and ensuring alignment between production execution and program quality targets.
- Built and institutionalised in-house paint process capability across all new model programs, eliminating external vendor dependency and delivering **₹1 Cr+ in cost savings**.
- Represented Paint Shop operations at **top management program reviews, supplier governance forums, and daily manufacturing operations meetings** — influencing decisions on resource allocation, production priorities, and program risk.
- Deployed cross-functionally to Powertrain Maintenance as Production Ramp-Up Support Leader (Dec 2025 – Apr 2026), contributing to department KPI delivery and demonstrating **GM-level operational adaptability**.

Mahindra Vehicles Manufacturing Ltd (MVML) | Chakan, Pune

Apr 2010 – Jul 2017

Manager – Paint Shop Operations

- Led full Paint Shop operational ownership across Passenger and Commercial Vehicle programs — directing cross-functional teams, managing vendor relationships, governing spare and budget planning, and sustaining production continuity through new model launch cycles.
- Delivered **₹75L+ annualized cost reduction** through a structured process improvement initiative — led root-cause investigation, coordinated cross-functional corrective action, and embedded sustainable operational controls into standard practice.
- Directed greenfield and brownfield project execution — governed scope, vendor selection, installation timelines, commissioning milestones, and operational handover for plant-wide paint shop modernisation programs.
- Led team capability development through TPM, PM, and reliability engineering programs, improving operational availability and embedding a culture of proactive maintenance governance.

FANUC India Private Ltd | Pan-India | GM Talegaon & GM Halol

Jan 2008 – Mar 2010

Expert – Paint Application Systems & Program Launch Support

- Managed full launch program execution for **13 painting systems** across **two General Motors manufacturing sites** — directing installation scope, commissioning governance, process qualification, and operational readiness handover to plant teams.

- Served as dedicated Program Support Leader for GM India for **2 years post-launch** — managing critical escalation resolution, spare parts governance, and 24-hour operational continuity commitments.
- Delivered structured capability transfer programs for GM manufacturing teams at Talegaon and Halol, enabling self-sufficient operations management.

Mahindra & Mahindra Ltd | Nashik / Mumbai

May 2000 – Jan 2008

Deputy Manager – Paint Shop Operations | Maintenance Executive – Engine PU

- Led Paint Shop operations and new model introduction activities across **8 years** and **two manufacturing facilities** — coordinating cross-functional teams, supplier relationships, and production systems to sustain delivery commitments through multiple program launches.
- Managed production process governance, vendor coordination, and escalation management for Paint Shop manufacturing systems, contributing to plant-wide operational reliability targets.

Earlier Career (1995–2000): Engineering and project management roles at Romar Positioning Equipment (Reliance Petroleum – Jamnagar), Neutron Electronics, Abee Printer Ribbons, and Krupp Industries — building foundational skills in manufacturing operations, project execution, and cross-functional coordination.

KEY PROGRAM & OEM EXPOSURE

Tata Punch · Tata Nexon EV · Tata Altroz · Tata Tiago / Tigor · General Motors (Talegaon & Halol) · Mahindra CV Programs

LEADERSHIP & BUSINESS IMPACT

Current responsibility for a team of approximately 50 members, with prior leadership of 150+ members across manufacturing and maintenance functions.

Own Paint Shop Maintenance CAPEX planning and execution of approximately ₹4 Crore, supporting asset reliability, modernization, and operational readiness.

Operate in high-volume automotive manufacturing environments with multi-program launch exposure, production ramp-up support, and plant-level operational governance.

Represent operational teams in management reviews, supplier forums, and cross-functional coordination meetings to support disciplined execution and issue resolution.

TECHNICAL PROFICIENCY

Quality & Manufacturing Systems: Six Sigma (Yellow Belt), TPM, TQM, TBEM, Root Cause Analysis, MTTR/MTBF, LQOS

Program & Operations Tools: Production Planning, Launch Scheduling, Ramp-up Management, Startup Stabilisation, Risk Governance

Domain Knowledge: Paint Shop Operations, Industrial Automation, Dürr Systems, ABB / FANUC / KUKA Platforms, PLC Process Control

EDUCATION

PG Diploma – Operations Management | Welingkar Institute of Management, Mumbai | 2015 | 1st Class (71%)

B.E. – Electronics & Communication Engineering | Karnataka University | 1995 | 1st Class with Distinction (71.5%)

CERTIFICATIONS & RECOGNITION

TBEM Gold Standard Practitioner · **Lean Six Sigma – Yellow Belt** · **#1 Rank – Tata Group E-Learning Platform (16,000+ employees)** · TataProEngage Volunteer Program Participant
